The Atria Difference
Setting the Standard for Community Living
Why do the wisest older adults and their families choose Atria?

We offer ideal locations that make it easier for them to stay involved in the communities they love.

We provide dynamic environments where they can continue to live independently with discreet support if needed.

We create meaningful events and delightful dining experiences based on their personal interests and tastes.

We strive to uphold the highest quality standards in the industry to ensure their safety and satisfaction.

We continually improve our service through ongoing partnerships, research and innovation.

We are committed to rewarding our employees and providing them with opportunities to grow personally and professionally.

We consistently invest in improving the sustainability of our communities to promote a healthier planet for future generations.
We believe in the extraordinary potential of older adults.

We understand that society benefits immeasurably from their wisdom, resilience, perspective, talent and creativity. That’s why we seek to create vibrant communities where our residents can thrive and participate. Keep them connected and involved, and enjoy access to opportunities that keep making a positive difference in our world.

We strive to uphold the highest quality standards in the industry.

In our communities that offer care services, each resident receives a thorough assessment from a licensed nurse before move-in and periodically thereafter. That means we’re able to tailor services to individual needs and are among the leaders we consider in determining and monitoring staff levels.

We collaborate with our residents to create more meaningful daily experiences.

Many programs are led by our wise and accomplished residents; we are home to more than 300 International Council on Active Aging® Champions. Our residents enjoy at least two illness prevention opportunities every month; more than 2,500 Presidential Active Lifestyle Award recipients call Atria homes.

We make sure our residents dine very well – in excellent company.

Dining

At least 30 options are on the menu every day; from scratch with fresh, seasonal and often local ingredients – and presented with full table service.

We are a leader in the larger conversation on aging and longevity.

Partnerships with key thought leaders and researchers, we develop innovative programming and methods in our industry.

We know that to be the best place to live, we must also be the best place to work.

Rewarding our employees and helping them grow personally and professionally is key to providing the best service to our residents.

We consistently invest in the future – of our communities and the environment.

We’ve invested $500 million in developing our communities and improving their sustainability – because we’re committed to serving our residents’ grandchildren, too.

Our green practices include:
- ENERGY STAR® appliances
- Low-flow plumbing fixtures
- Energy-efficient lighting and windows
- High-efficiency HVAC systems
- Earth-friendly paint, carpet and wood
- Roofing for aqua-mayking and sustainability

We are a proud member of the U.S. Green Building Council® and 10 of our communities have earned or are seeking LEED® certification.

*LEED® – an acronym for Leadership in Energy and Environmental Design™ – is a registered trademark of the U.S. Green Building Council and is the preeminent program for the design, construction, operation and maintenance of high-performance green buildings.

We help more than 21,000 people live more independently, longer.

We are one of the largest senior living providers in North America. Backed by strong company-wide experts, our communities complement and enrich the local neighborhoods and cities they serve.

We offer the flexibility of private-pay rental apartments with no long-term commitment. That means our residents can, and do, choose again and again.

We work with Columbia University’s International Longevity Center to study how older adults can thrive in congregate living settings.

Our green practices include:
- Energy-efficient lighting and windows
- High-efficiency HVAC systems
- Low-flow plumbing fixtures
- LEED® appliances

We seek a LEED ®–NC certification® for new developments and have 10 communities seeking LEED® certification.
